

IREL 373 An Arc of Crisis in Europe's South**Monday-Wednesday 17:15-18:50****SPRING 2023****Course Description**

This course's central assumption is that there is a long arc of crisis starting in the Baltics and Eastern Europe, continuing to the Black Sea, the Mediterranean and the Middle East, then to the Persian Gulf and all the way to the AfPak (Afghanistan-Pakistan) region. Security developments in those regions are often interconnected, thus making any management and resolution efforts considerably more difficult. The focus of the course is on unfolding events in the regions of the eastern Mediterranean, Southeastern Europe (including Greece and Turkey) and the Black Sea region from the perspective of peace and conflict. During this critical juncture for Europe and the greater region of the Middle East and North Africa, our course takes on a further dimension as it looks at the geopolitical dimensions of the political and economic crisis in Europe and the current turmoil in the Middle East.

The main concern in the course is conflict analysis (causes and consequences) with an emphasis on conflict management and resolution. It examines the reasons that contribute to the emergence and endurance of a conflict as well as the implications for regional and international peace and security. Moreover, the course examines different threats and challenges to international security such as terrorism and religious extremism.

We will also examine and discuss the main trends and drivers that will shape the world and Europe's southern neighborhood in the next 10 years. The focus will be on both existing and new facets of security with the potential to disrupt a linear evolution of the security environment. As there is an obvious linkage with global trends and changes, there will be a brief reference to key global trends and drivers (with an emphasis on the role of emerging powers and non-state actors, population/demographic dynamics, economy, natural resources and technology) and their potential influence on regional developments.

Assigned readings are designed to reflect alternative points of view permitting constructive synthesis based on a continuing in-class dialogue. Among the conflicts and challenges to be considered are: (1) the crisis in Ukraine and the current state of relations between the West and Russia (2) migration/refugee flows from Europe's southern neighborhood (3) the continuing conflict in Syria (4) instability in Libya (5) the challenge of Jihadist terrorism (4) the Israeli-Palestinian conflict (5) the Greek-Turkish rivalry and the Cyprus problem (6) energy geopolitics and the influence on regional and international security and (7) the integration of the Western Balkans into the European security architecture and remaining challenges in that region.

Course Requirements

Topics for the term paper + poster (2,000 words):

The emergence of a new international system: main actors, key trends and drivers

A critical approach to the 'Decline of the West and the rise of the Rest' theory

The proliferation of weapons of mass destruction: prospects and consequences

The US role in the 21st century international system

Mapping international conflict: Where and what type?

State of transatlantic relations: Do we need to redefine the concept of the 'West'?

EU: Challenges and prospects

The crisis in Ukraine: causes and consequences

Is a new Cold war between the West and Russia unavoidable?

The Syrian civil war: causes, main players and possible solutions

Has the Islamic State been defeated?

A final opportunity to resolve the Cyprus problem?

Arab revolts: causes and consequences

The mother of all conflicts: how can the Israeli-Palestinian problem be resolved?

The regional role of Turkey

The Balkans today: problems and prospects for the future

U.S. interests in the “Greater Middle East”

The geopolitics of hydrocarbons in the Eastern Mediterranean (19)The role of China in the Mediterranean and Southern Europe

Key regional and extra-regional actors in the Mediterranean

Nagorno-Karabakh: from ‘frozen conflict’ to ‘cold peace’?

Could things have turned out differently in Afghanistan?

If two students wish to submit a joint paper, the length should be approximately 3,500 words

Paper & poster due: Last day of classes (they can be submitted in electronic or printed format)

Evaluation and Grading

Participation and attendance: 10% (*see note at the end of the syllabus*)

Mid-term: 10%

Class presentations: 15%

Term paper: 25%

Poster: 20%

Final Take Home Exam (approximately 1,500 words): 20%

There will also be optional assignments, such brief oral presentations of articles and debates between students on topical issues. Such assignments will offer additional credit.

Topics for the term paper + poster (2,000 words):

- (1) The emergence of a new international system: main actors, key trends and drivers
- (2) A critical approach to the ‘Decline of the West and the rise of the Rest’ theory
- (3) The proliferation of weapons of mass destruction: prospects and consequences
- (4) The US role in the 21st century international system
- (5) Mapping international conflict: Where and what type?
- (6) State of transatlantic relations: Do we need to redefine the concept of the ‘West’?
- (7) EU: Challenges and prospects
- (8) The crisis in Ukraine: causes and consequences
- (9) Is a new Cold war between the West and Russia unavoidable?
- (10) The Syrian civil war: causes, main players and possible solutions
- (11) Has the Islamic State been defeated?
- (12) A final opportunity to resolve the Cyprus problem?
- (13) Arab revolts: causes and consequences
- (14) The mother of all conflicts: how can the Israeli-Palestinian problem be resolved?
- (15) The regional role of Turkey
- (16) The Balkans today: problems and prospects for the future
- (17) U.S. interests in the “Greater Middle East”
- (18) The geopolitics of hydrocarbons in the Eastern Mediterranean
- (19) The role of China in the Mediterranean and Southern Europe
- (20) Key regional and extra-regional actors in the Mediterranean

- (21) Nagorno-Karabakh: from ‘frozen conflict’ to ‘cold peace’?
- (22) Could things have turned out differently in Afghanistan?

*If two students wish to submit a joint paper, the length should be approximately 3,500 words
Paper & poster due: Last day of classes (they can be submitted in electronic or printed format)*

CYA Regulations and Accommodations

Attendance Policy

CYA regards attendance in class and on-site (in Athens or during field study trips) as essential. Absences are recorded and have consequences. Illness or other such compelling reasons which result in absences should be reported immediately to the Student Affairs Office. A component of the final grade is the extent of your participation in class discussions. Attendance is taken at each class meeting. Only one (1) unexcused absence is allowed. Further absences may result in the lowering of your final grade. In case of illness it is your responsibility to contact me and to make up for missed work (see the general stipulations in the CYA student handbook).

Policy on Original Work

Unless otherwise specified, all submitted work must be your own original work. Any ideas taken from the work of others must be clearly identified as quotations, paraphrases, summaries, figures etc., and accurate internal citations and/or captions (for visuals) as well as an accompanying bibliography must be provided (Check the Student Handbook, pg. 7).

Use of Laptops

In-class or onsite use of laptops and other devices is permitted if this facilitates course-related activities such as note-taking, looking up references, etc. Laptop or other device privileges will be suspended if devices are not used for class-related work.

Class Schedule

Week 1 (Jan 30, Feb 1)	<p>(a) Introduction to the course: Scope and Goals</p> <p>(b) Global and regional trends and drivers</p> <p>There is increasing agreement among experts and policymakers that the American unipolar moment is already behind us and that the future international political system will be multipolar, with the US as <i>primus inter pares</i>, but with China (already the second largest global economy and projected to surpass the US sometime in the next 20 years), India, Japan, the EU and probably a number of regional powers playing an increasing role. In combination with the financial and political crises of the last 2-3 years and of other global challenges, this raises questions of global governance. Ambitious regional powers will cause turbulence and tension in various parts of the world, the Middle East included.</p> <p>The larger number of poles of power and of active and influential international actors, the increasing number and role of non-state actors [be they agents or spoilers of cooperation] have transformed the global and regional security chessboards into substantially more complex environments. We will discuss a number of key global trends and drivers (with an emphasis on the role of emerging powers and of non-state actors, population/demographic dynamics, economy, natural resources and technology) and their potential influence on regional developments.</p> <p>Readings:</p> <ul style="list-style-type: none"> • Global Strategic Trends- Out to 2045 https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/348164/20140821_DCDC_GST_5_Web_Secured.pdf • Global Trends 2040 https://www.dni.gov/index.php/global-trends/letter-nic-chairman • Global Trends to 2035 - European Parliament www.europarl.europa.eu/RegData/etudes/STUD/2017/...

-

**Wee
k 3
(Feb
8,
13):**

Hot spots and sources of insecurity in Europe's Eastern Neighborhood

- (a) The crisis in Ukraine is indeed Europe's most serious post-Cold War security challenge since the Balkan Wars. After the shooting down of Flight MH17 the situation has escalated, efforts to resolve the crisis through diplomatic means have met with very limited success so far and the end result may very well be a new Cold War of unknown duration and consequences between the West and Russia. To better manage the next stages of the crisis, it is important to understand how the situation escalated to this degree.

It will be argued that there are obvious differences on a range of topics and diverging short and medium-term interests between the West (although, of course, there may be differences between the US and Europe or among Europeans on several issues) and Russia. Given, however, the energy [inter]dependence and the [rather] converging long-term geostrategic interests of the EU and [a 'satisfied' and integrated] Russia (for example, managing the challenges of Islamic extremism and of rapidly increasing Chinese power), there are many good reasons to avoid further escalation of the crisis. Of course, accidents and miscalculations constitute an integral part of international politics, as demonstrated by the explosive outbreak of the First World War exactly one hundred years ago.

But the focus of discussion will be the February 2022 Russian invasion of Ukraine and the continuing war. We will examine the causes of the conflict, Russia's objectives, the current situation on the ground, the geopolitical and geo-economic consequences, as well as the possible outcomes.

- (b) The Nagorno-Karabakh conflict is the longest-running in post-Soviet Eurasia. In 1988, ethnic Armenians living in Nagorno-Karabakh demanded the transfer of what was then the Nagorno-Karabakh Autonomous Oblast (NKAO) from Soviet Azerbaijan to Armenia. As the Soviet Union collapsed, tensions grew into an outright war. When fighting ceased in 1994, Nagorno-Karabakh and seven adjacent districts were wholly or partially controlled by Armenian forces. More than a million people had been forced from their homes: Azerbaijanis fled Armenia, Nagorno-Karabakh and the adjacent territories, while Armenians left homes in Azerbaijan.

- In September 2020, full-fledged war resumed. Six weeks of bloody armed conflict finally ended in the early hours of 10 November with a ceasefire brokered by the Russian Federation. Although the deal remains short of a clear and stable peace, it brought an end to the deadliest fighting the region had witnessed in nearly three decades. By its terms, Azerbaijan now again controls in full the seven districts adjacent to Nagorno-Karabakh that Armenian forces had held since the previous war. It also holds a substantial part of Nagorno-Karabakh itself.
- ***Students will briefly present the interests and policies of major actors (Ukrainian government, Russia, EU, US, NATO, etc.)***

**Week 4
(February 20,
22):**

(a) The Arab revolts: Causes and consequences

The situation in North Africa: Libya, Egypt and Tunisia

The Arab revolts have already caused an exponential increase in the region's volatility and unpredictability. Considerable uncertainty and fluidity will remain standard features of the region, and several regimes will face substantial challenges for their survival, probably including –in the future- Saudi Arabia and Iran. Short- and longer-term concerns include the nature and stability of new regimes, the consequences for relations between the West and the Arab world (including the impact on oil prices) and implications for transatlantic policies towards the region. The Arab revolts are likely to lead to a far more heterogeneous and fragmented region and possibly to an increasingly polarized Mediterranean.

Revolts –caused as much by the need for greater political participation and the emancipation of the citizens of Arab countries, as by the increase of food prices and growing economic hardship-- overthrew or seriously challenged regimes in six countries: Tunisia, Egypt, Libya, Yemen, Bahrain and Syria. The uprisings also affected the domestic political situation and developments in Morocco, Jordan and some GCC countries. For different reasons in each case, Lebanon, Iraq, Algeria and Palestine have been relatively unaffected by the revolts, although Lebanon's stability may be seriously challenged as a result of the conflict in Syria. One could also situate Arab countries in a continuum. The criterion would be the level of conflict which resulted from the uprisings: violent, political, festering or minimal. In such a continuum Syria would be placed at one end and Algeria on the other.

10 Reasons for the Arab Spring. The Root Causes of the Arab Awakening in 2011
<https://www.thoughtco.com/the-reasons-for-the-arab-spring-2353041>

(b) The Eastern Mediterranean conundrum I
The civil war in Syria and regional security

Although some analysts have described the Syrian conflict as a confrontation between Iran-led and pro-Western camps, a different narrative suggests a deepening Sunni-Shia rift in the Middle East, with Syria being the main area of competition, with the Assad regime, Iran and Hezbollah on one side and Saudi Arabia, Qatar, Turkey and Egypt on the other. Of course, the Sunni-Shia divide is also seen as running through societies, not just across them. Furthermore, one should not downplay the profound divisions and tensions within the Sunni

camp (for example the rivalry between Salafi and more moderate Islamist forces or the different agendas and ambitions of the main Sunni states). If there is no diplomatic solution, the Syrian conflict may have profound consequences for the whole region.

The stabilization of the country and the processes of reconstruction and reconciliation will be extremely difficult challenges for the international community.

a. The conflict in Syria (continued)

b. The Eastern Mediterranean conundrum II

The situation in Iraq and the Kurdish question

Four years after the beginning of the Arab revolts, the Mediterranean and the Middle East have changed considerably and the key words describing the regional security environment are fluidity, instability and unpredictability. There has been regime change in several countries (Tunisia, Egypt, and Libya –in the latter case also because of a NATO operation), violent suppression of the protests in Bahrain, continuing instability in Yemen and a brutal civil war in Syria.

Current regional instability is the result of a combination of factors: a number of weak, artificial states (most of them created by the Sykes-Picot agreement of 1916) crumbling under strain, the extremely unfortunate choices of major powers still plaguing the region, the lack of a regional security architecture, an evolving global and regional system, poverty and lack of democracy, existing regional conflicts, the ambitious agendas of regional powers, Islam's struggle to find its position in the modern world and the appearance of sectarian tensions, and a serious economic and political crisis in Europe, combined with concerns about the future of the EU and weak leadership in Europe. All those factors combined to form an almost perfect storm in the Mediterranean and the Middle East.

The Kurds remain the largest ethnic group without a state. Their total number is estimated at 25 to 30 million, and they live mainly in Turkey, Iraq, Iran and Syria. Their desire to create an independent Kurdish state has been causing varying degrees of concern to host countries. The Kurds of Northern Iraq have enjoyed wide autonomy for two decades and are unlikely to willingly relinquish it. If circumstances allow in the future, they may try to replace de facto with de jure independence. Despite Turkey's clever policy of economic and political engagement of the Kurdish entity in northern Iraq, there is concern that Ankara's inability to resolve its own Kurdish problem may increase the future attractiveness of a Kurdish state for Turkey's own Kurdish population. The same is true, to a lesser extent, for Kurdish populations in Iran and Syria.

-

Week 6 (March 13, 15):**a. Population movements across the Mediterranean**

By early September 2015, the UN announced that 7 million people had been displaced in Syria from a pre-war population of 22 million, with more than 4 million seeking safety outside Syria. Of those 2.1 million Syrians registered by UNHCR in Egypt, Iraq, Jordan and Lebanon, and 1.9 million Syrians registered by the Turkish government. It is possible that the actual numbers, especially in Jordan and Lebanon, may be higher. Although these facts have been known for some time, the sudden increase in the influx of refugees from Syria and other conflict-ridden regions (Iraq, Eritrea, Afghanistan, etc.) caught Europe by surprise. With Greece and Italy as the main gates, most asylum seekers follow the so-called Balkan corridor through FYROM, Serbia, Croatia, Hungary and Austria in an effort to reach Germany and other northern European countries. Countries of first entry, transit and final destination have been trying, rather unsuccessfully, to manage the refugee/migration flows. The Schengen Agreement, one of Europe's most tangible and widely recognizable achievements, is now faced with considerable, even existential challenges. The limited enthusiasm of several EU states (mainly in Eastern Europe but also in other parts of the continent), with the notable exceptions of Germany and Sweden (although the former already finds itself under tremendous pressure because of the large numbers of asylum seekers), to undertake any meaningful commitments in the context of a burden sharing agreement promoted by the European Commission, is once more testing the concept of a border free Europe, the limits of European solidarity and the idea of common European policies.

b. Mid-term

Wee
k 7
(Mar
ch
20,22
):

a. The regional role of Turkey; US-Turkey relations

Turkey's regional role and international role has been significantly upgraded in the last few years as a result of the country's impressive economic performance and its ambitious multi-directional foreign policy of "zero problems with the neighbors". Professor Ahmed Davutoglu, the "guru" of AKP's foreign policy, frequently refers to Turkey as a "central" power and has been using the country's soft power and the Ottoman cultural heritage as means to extend/increase Turkish influence in the Middle East, the Balkans and beyond. Undoubtedly Ankara has evolved into a more autonomous regional actor, a potentially important energy player (as an energy hub), a willing mediator in various conflicts and an influential power in the Muslim world (and possibly as a model of the co-existence of political Islam and democracy).

Some of the questions debated by foreign policy establishments in various interested countries include whether the AKP government has been gradually transforming Turkey into an Islamic-“lite” country and whether this may cause a strong reaction by Kemalist and other pro-secular forces in Turkish society, whether its regional policies are compatible with transatlantic interests and whether it is drifting away from the West (“who lost Turkey?”). There is also a feeling in some circles that Turkey may at some point fall into the trap of strategic over-extension (i.e. failure to match means and objectives), but this remains to be seen. The majority of policy-makers persist that it is in the best interest of all sides if Turkey remains anchored to Western institutions, but that this may not be an option anymore as far as EU membership is concerned as there is increasing opposition not only in Europe but also in Turkey itself. Key questions for Turkey's future regional role will be the Syrian question, the possible reaction of Egypt and Iran to the attempted expansion of Turkish regional influence, the evolution of its relationship with Israel, the resilience of the “Turkish economic miracle” and the management of the Kurdish issue. Also, the impact of the failed coup d'etat of July 14, 2016, will be examined.

Readings:

Steven Cook, *Neither Friend nor Foe. The Future of U.S.-Turkey Relations* (https://cdn.cfr.org/sites/default/files/report_pdf/CSR82_Cook_Turkey_0.pdf)

Marc Pierini, Francesco Siccaldi: *Understanding Turkey's Direction: Three Scenarios*, Carnegie Europe (<https://www.observatoireturquie.fr/marc-pierini-francesco-siccaldi-understanding-turkeys-direction-three-scenarios-carnegie-europe/>)

a. The Cyprus problem

For quite some time there have been two main obstacles: (a) Turkey's unwillingness to change its perception of the island's geostrategic importance and the resulting 'need' for direct or indirect control of Cyprus through hard power (interestingly, a view expressed not only by the Kemalist establishment but also by Turkish Foreign Minister Ahmet Davutoglu in his book "Strategic Depth"); (2) the Greek Cypriots' inability to make a final decision or to state openly what kind of (realistic) solution they wish to have. There seems to be an obvious reluctance to share political and economic power with the Turkish Cypriots. Indeed, to many Greek Cypriots (especially among the younger generation), the status quo looks more appealing than any proposed alternative. The International Crisis Group (IGC), in a report published in the fall of 2009, suggested that "the island may be accelerating a slide toward permanent partition and that some elements in both communities given 36 years of futility and the wide differences of opinion over each item on the table from property rights to Turkish settlers to governance, may be willing to concede the possibility of a permanently divided island."

Currently, the most serious obstacle ahead is not whether the involved parties will agree to a settlement. Although far from guaranteed, it is not impossible to achieve. The most difficult part will be to ensure that a legitimizing majority will vote in favor of a settlement plan in a referendum. How can we address the concerns and fears of both communities? What would it take to convince undecided citizens on both sides that the status quo is not the best option, that the other side is serious about finding a solution and that an acceptable solution is within grasp, with obvious and tangible benefits for all involved? How could the Turkish government be persuaded to take –in turbulent domestic but also regional times- concrete and constructive steps towards a solution, at the same time shielding itself from domestic criticism (as the nationalist “Cyprus lobby” has not lost all power and influence in Turkey)?

Students will briefly present the interests and policies of major actors (Greek-Cypriots, Turkish-Cypriots, Turkey, Greece, EU, US, etc.)

Documentary: *Sharing an Island* by Danae Stylianou (2011)

Week 8 (March
27, April 3):

a. The Cyprus problem (continued)

b. The geopolitics of energy

The global energy landscape is changing, shaped by shifting demand patterns, new deposits and fields entering the production stage, new players, alignments and evolving rules. The energy dimension will remain extremely important in the wider Middle East geopolitical landscape. Caspian resources could provide an important additional long-term source of energy for world markets, although still much less significant than Middle Eastern sources. European oil dependence on the Middle East will continue, thus providing a strong incentive for securing the continuous supply of energy products. Of course, shale gas and oil-related developments in the US and its predicted transformation to an energy exporter (in combination with other developments such as the pivot to Asia and a possible rapprochement with Iran) may have a profound impact on US perceptions and policies vis-à-vis the Middle East.

The discovery of significant natural gas deposits in the exclusive economic zones of Israel and Cyprus and the alleged deposits of the Levant Basin may provide an additional energy source outside the former Soviet space and the Middle East proper and therefore contribute to the diversification of Europe's natural gas suppliers. Although the deposits discovered so far in Cyprus and Israel are not expected to have a transforming effect on Europe's energy situation, they can hardly be ignored as long as Europe continues to voice concerns about its energy security (and especially after the evolving crisis in Ukraine). In any case, the picture may change as there are additional explorations under way in Cyprus, Israel and Greece.

(<http://www.crisisgroup.org/~media/Files/europe/turkey-cyprus/cyprus/216-aphrodites-gift-can-cypriot-gas-power-a-new-dialogue.pdf>)

Week 9 (April 5,
a.
Greek-Turkish relations
9):

Greek-Turkish relations remain, of course, at the top of Greek foreign policy agenda. Overall, the two countries are better off today in terms of bilateral relations (including trade and people-to-people contacts) than they were a few years ago [before 1999 to be more precise]. Having said that, neither country has moved from their firm positions regarding ‘high politics’ issues and Greece and Turkey continue to perceive each other through a Hobbesian prism. Although the majority of Greek policy-makers have been moving away from “zero-sum game” perceptions regarding Greek-Turkish relations, skepticism and distrust continue to linger. For different reasons neither side appears prepared to make any meaningful concessions in order to resolve their differences, and that will remain the case for the immediate future. Both sides should focus on improving economic relations and avoiding conflict on energy resources in the Eastern Mediterranean through respect for the relevant provisions of international law. They could also explore ideas for confidence-building measures regarding overflights, violations and dogfights in the Aegean. Such agreements would greatly help in keeping tensions low, thus preparing the ground for an eventual full normalization of bilateral relations between Greece and Turkey.

<https://www.crisisgroup.org/europe-central-asia/western-europemediterranean/263-turkey-greece-maritime-brinkmanship-dialogue>

b. The Palestinian problem: Current situation, problems, prospects for a solution

Probably accurately labeled the 'mother of all conflicts', it remains, at least symbolically, if not in substance, the most important regional conflict in the Middle East. If not resolved in a mutually acceptable and viable manner, it will continue to cause tension and suffering in all parties involved, and to be used by radicals in the Muslim world as a justifying cause for their jihad(s). There are three possible scenarios:

- (1) a peace settlement based on the two-state model and the parameters of various plans tabled in the past several years (Camp-David [2000], Taba, Saudi Peace Initiative, Geneva Initiative, etc.) Israel and the Palestinians reach an agreement. A Multinational Force (MNF) is deployed to guarantee the implementation of the agreement. Problems between Israel, Syria and Lebanon are resolved in the context of a Middle East Peace Treaty. This could lead to a large-scale [positive] transformation of the whole region;
 - (2) continuation of the *status quo*. A 'slight' deterioration is more likely as time passes by without a peace agreement;
 - (3) severe deterioration. Feeling that they have little to lose, the Palestinians decide to escalate the conflict and take their actions to the next level of violence, seeking ways to inflict damage that the Israeli society will find unacceptable and will therefore decide to negotiate along the lines of scenario 1. Scenario 3 may involve
-

radical Middle Eastern governments and non-state actors, acting overtly or covertly against Israel.

Students will briefly present the interests and policies of major actors (Israel, Fatah, Hamas, EU, US, Egypt, etc.)

Week 10 (April

19):

**Palestinian
problem
(continued)**

Week 11 (April

24, 26):

Are the Balkans still the powder keg of Europe?

Kosovo, FYROM, Bosnia-Herzegovina, the Albanian factor

Approximately one hundred years ago the Balkans were, literally, the powder keg of Europe. In the 1990s, the brutal Yugoslav civil wars brought back painful memories and served as a wake-up call for Europeans regarding the security and stability of the continent. Although it is becoming clear that this wake-up call went so far largely unheeded, at least the Balkans are now a relatively quieter neighborhood and inter-state conflict is rather unlikely. However, there are other security concerns, especially in the Western Balkans. As nicely phrased, ‘Over twenty years after Dayton, in most countries and entities in the Western Balkans, the objective of building integrated and cohesive societies in which diversity is considered a strength and a resource to be properly managed is far from being achieved’.
