# Student Testimonials

---

“

I can't express enough what a fantastic opportunity it was to study abroad with CYA. To explore Greece in particular, with a course that focused on ancient religion, brought the museums, sites, and artifacts alive **in a way that no other place on Earth possibly could.**

- Anne Halloin, Fordham University (SU '23)

“

In my time in Greece **I found myself more aware of the cultural differences that exist in the world and felt more like a global citizen.** I also developed in my academics because I learned so much new information and also learned how to take in information and apply it outside of a classroom setting.

- Anabelle Daugherty, Doane University (SU '23)

“

Studying abroad allows you to view life through a different lens. You get exposed to new things, being things you will like and things that you will hate, but the exposure only helps you learn more. **Study abroad allows students to learn so many new things in and out of the classroom and has endless benefits.**

- Ashley Giampolo, Siena College (SU '23)
